
Rows: comparison (scans / patients). Shaded: pre-registered equivalence margin (±0.05 F1; ±1 false lesion per scan). Thin line: 95% CI; thick line: 90% CI (equivalence criterion). Patient-cluster bootstrap stratified by cohort, 10,000 replicates; Holm over the registered family size (tests not run count as p = 1). '< 0.002' / '< 0.003': no replicate crossed zero.
