Safety Class of Unit: ☐ A ☐ B ☐ C

Code Review Checklist (IEC 62304 Clause 5.5.3, 5.5.4)

Check	Criterion
☐	Code implements the detailed design specification (DD-001)
☐	Coding standards followed (ESLint / PEP 8)
☐	No commented-out code without linked issue
☐	Input validation present for all external inputs
☐	Error handling covers all failure modes from design
☐	No unhandled exceptions/promise rejections
☐	Safety-critical calculations verified (units, ranges, overflow)
☐	Risk control measures correctly implemented (HAZ-IDs: _____)
☐	No hardcoded credentials or secrets
☐	Authentication/authorization checked on endpoints
☐	Functions under 50 lines (or justified)
☐	Named constants instead of magic numbers
☐	Unit tests present for new/modified code

Check	Criterion
☐	All tests pass locally and in CI
☐	No unintended functionality (Class C requirement)
☐	Robustness with invalid inputs verified (Class C)
☐	SOUP APIs used correctly per documentation

Result

☐ APPROVED ☐ APPROVED WITH COMMENTS ☐ REJECTED
