CODE REVIEW CHECKLIST (IEC 62304 Clause 5.5.3, 5.5.4)

General

- ☐ Code implements the detailed design specification (DD-001)
- ☐ Coding standards followed (ESLint for TypeScript / PEP 8 for Python)
- ☐ No commented-out code without linked issue
- ☐ Code comments appropriate and up to date

Safety (Class B and C)

- ☐ Input validation present for all external inputs
- ☐ Error handling covers all failure modes from detailed design
- ☐ No unhandled exceptions / promise rejections
- ☐ Safety-critical calculations verified (units, ranges, overflow)
- ☐ Risk control measures correctly implemented (HAZ-IDs: _____)

Security (IEC 81001-5-1)

- ☐ No hardcoded credentials or secrets
- ☐ Input sanitization against injection
- ☐ Authentication/authorization checked on endpoints

Class C Specific (IEC 62304 Clause 5.5.4)

- ☐ No unintended functionality

- ☐ Robustness with invalid inputs verified
- ☐ SOUP APIs used correctly per documentation
- ☐ Memory management adequate

RESULT

- ☐ APPROVED
- ☐ APPROVED WITH COMMENTS
- ☐ REJECTED
